## Introduction

eSports Manager uses Web Technology and SMS mobile messaging to automate the management of sports fixtures, update the web in real-time and send out match results by text message minutes after the final whistle. eSports Manager significantly reduces workload and increases efficiencies for sporting bodies.

The system was piloted with a number of GAA football County Boards in Ireland, and 14 GAA County Boards are currently using it. eSports Manager is now being rolled out to soccer, rugby, hockey, handball and basketball in Ireland, Northern Ireland and Great Britain.

21st Century Sports knows how much work goes on behind the scenes by sporting bodies - *and all of this is often done manually by a few volunteers or overworked administrators!* eSports Manager has fully automated a huge amount of this work. It also allows sporting bodies to stay in touch with their supporters worldwide with an up to the-minute website and the facility to send out text alerts.

This groundbreaking software has been developed by 21<sup>st</sup> Century Sport in Castlebar, Co Mayo, Ireland. 21<sup>st</sup> Century is a leading supplier of web solutions to sporting organisations.
